(54) Title: METHOD OF DISPLAYING AN INTERACTIVE CONTENT

(57) Abstract: The invention relates to a method of displaying elements (31, 32, 33, 34) of an interactive content on a screen intended to display data transmitted in a digital television format comprising subtitles, by means of a command interface comprising a plurality of inputs. The elements of the interactive content are comprised in interactive subtitles, an interactive subtitle being associated with a link table indicating at least one correspondence between an input of the command interface and another subtitle. A subtitle based on an interactive subtitle is displayed by activating the input of the command interface corresponding to this subtitle.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *G* document member of the same patent family
